

Product Name : Acetamide Agar (Twin Pack)	Product Code : NLAB-CHEMICALSIND21002
Description :	
Acetamide Agar (Twin Pack)	
Technical Specification :	
Agar is formulated as per the recommendation of Standard Methods for the Examination of Water and Wastewater. Acetamide deamination leads to the liberation of ammonia, which thereby increases the pH of the medium, leading to a subsequent colour change of the phenol red indicator from yellow orange to purplish red. This unique ability is useful in identification of various non-fermenting gram negative organisms.
