

Product Name :
Analog Tensile Testing Machine

Product Code :
NLAB-ENGINEERINGLB31007

Description :

Analog Tensile Testing Machine

Technical Specification :

This machine is used to held various tests like Compression, Cross breaking / Bending, Shear, Linear Bonding / Gripping / Peeling strength of adhesives & tapes etc.

It can test materials like rubber, wood, plastic, rexins, teflon, cardboard, composites, ferrous metals, non-ferrous metals etc.

Wide range of Grips, Attachments & Special fixtures are available to suit varieties of material and shapes. Continuous roll autographic Load Vs Elongation recorder.

Continuous roll autographic Load Vs Elongation recorder. Elongation scale with least count 1 mm.

Elongation scale with least count 1 mm. Three measuring ranges for accurate testing.

Three measuring ranges for accurate testing. A number of straining speeds are available for proper selection.

A number of straining speeds are available for proper selection. Machine with AC or DC drive motor is available.

Machine with AC or DC drive motor is available. Various Models – Maximum Capacity from 200 N to 50 kN.

Various Models – Maximum Capacity from 200 N to 50 kN. Loading accuracy well within $\pm 1\%$

Loading accuracy well within $\pm 1\%$ Hand operated cutting press with different sizes dies are available for cutting dumbbell specimen.

Hand operated cutting press with different sizes dies are available for cutting dumbbell specimen.
