

Product Name :
Auto Electrical Electronic Components Cutaway for Automotive Lab

Product Code :
NLAB-AUTOMOTIVETVET33001

Description :

Auto Electrical Electronic Components Cutaway for Automotive Lab Classroom Training. Automotive Engineering Laboratory Equipment Suppliers India

Technical Specification :

The training device for car lighting system. And it can fully display the structure and working process of the automotive lighting system. It is based on the automotive lighting system components. And it can display the structure of the lighting system. The working principle and process of the lighting system can be demonstrated. The test terminal is mounted on the test panel which makes the electrical signals, such as resistance, voltage, current, frequency, etc of the electrical components can be measured. Fault setting module

Function introduction of main components of car lighting system

Demonstration of the work principle and process of car lighting system

Measurement of the signals of the sensors and actuators by multi-meter or oscilloscope

Fault set and troubleshooting

Headlights

Front/rear fog lights

Light switch assembly

Tail lights

Dimmer switch assembly

Reversing light switch

License plate light

Front corner lamp

Side lights

Brake light switch

Dashboard

Fault set module

Mobile stand

Automotive Electrical and Automotive Electronic Systems for technician training classroom. Automotive Electronic Laboratory Instrumentation. Automotive Engineering Laboratory Equipment Suppliers India
