#### **Product Name:**

**Chemical Reactor Training Equipment** 

#### **Product Code:**

**NLAB-ENGINEERINGLB36008** 

## **Description:**

**Chemical Reactor Training Equipment** 

### **Technical Specification:**

The contact time and reaction temperature can be varied.

The unit contains two supply tanks for the liquid chemicals.

The properties of different chemical reactors can be investigated by performing a specification reaction using this trainer.

Their influence on the conversion of reactants is observed in the respective reactor.

| The reaction is moderated using a controlled hot water circuit.  |
|--|
| The reactors are available as accessories.   |
| Two variable speed diaphragm pumps pump the reactants through the reactor.   |
| Reactant conversion and reaction temperature are measured with a combined conductivity and temperature measuring unit. |
| It is also possible to use PC data acquisition.  |
| The resulting reaction product is collected in a stainless steel tray in the unit.                                     |
