|                                                                      |                                                 |
| <b>Description :</b>                                                 |                                                 |
| Naugra Lab Digital Respinometer                                      |                                                 |
| <b>Technical Specification :</b>                                     |                                                 |
| Polished Stainless Steel tank, with capacity of 7 manometers a side. |                                                 |
| Digital temperature display with resolution of 0.1 deg. C.           |                                                 |
| Temperature control to within +/-0.5 deg. C.                         |                                                 |
| Stainless Steel immersion heater.                                    |                                                 |
| Stirrer for uniform temperature.                                     |                                                 |
| Manometers mounted on graduated scale for reading pressure changes.  |                                                 |
| Flask with center well & side flask attached to manometer.           |                                                 |
| Oscillation of manometer approximately 90 rpm.                       |                                                 |
| Powder coated exterior, with wheels for easy mobility.               |                                                 |
| Capacity 7 manometers, temperature range of 5 deg.                   |                                                 |
| C above ambient to 60 deg. C                                         |                                                 |
