

Product Name :
Distillation Training Unit

Product Code :
NLAB-ENGINEERINGLB54029

Description :

Distillation Training Unit

Technical Specification :

- The Process Operator Training Unit was conceived and designed to give the operator of fractionation and distillation equipment a visual concept of what goes on inside those metal towers or columns that dominate the landscape in a petroleum refinery or petrochemical plant.
- There are no automatic controls so that whatever happens on this unit is dependent on what the operator does, or does not do.
- The glass fractionating column allows the operator to see the results of his actions very quickly.
- Consists of the following equipment; Main Column, Pumps (4), Overhead Condensers, Heat Exchangers, Cooling System, Reboiler, Temperature Gauges and piping to actually perform distillation on a small scale model.
- This unit comes with carrying case which acts as a stand for the unit.
- This unit has been a staple in the process training industry

worldwide for many years and is currently our most widely used production item.

- With its hands-on learning experience, it is hugely popular in basic process classes in industry and education.

We are well-known manufacturers, OEM suppliers of Distillation Training Unit for Applied Machines. Contact us for high quality Distillation Training Unit for Applied Machines for schools lab, college lab, universities, research labs, various teaching and workshop training laboratories and industries in India.
