

Product Name :
Electrical Machine System

Product Code :
NLAB-ELECTRICALAB190002

Description :

Electrical Machine System

Technical Specification :

Electrical Machine System

Electrical Machine System Manufacturer

Featured

Modular design provides flexible experimental requirement

Each Module panel height compatible with DIN A4 standard Using 4 mm safety sockets and plugs

Each DC/AC power supply equipped with overload protection

Rotary machine and brake with overheating protection

Adopting digitized and microprocessor-based measuring instrument to provide high-accuracy measurement

Brake with constant speed / constant torque function, easy to operate

Drawing complete T/N curve

Connecting to PC, measuring and drawing characteristic curve available

300W-grade designed equipment suitable for learning the theory and characteristics of electrical machines

Stand-alone machine design equipped with two shaft ends and aluminum alloy base for coupling to other machines

Training panel uses 5 mm isolation bakelite, printed component symbol, value and function, easy to connect

Fully protected system safe to connect various kind of machines

Providing powerful computer measuring software for saving graphic.

Description

The electrical machines system leads students to distinguish the mechanical similarities and differences among all electrical machineries. Students study and turn all kind of electrical machineries into circuit models for the foundation. Moreover, it enhances students ability for further employing and controlling. Besides facilitating teaching, it makes students be familiar with every kind of electrical mechanical test.
