| <b>Product Name :</b><br>Light Meter                          | <b>Product Code :</b><br>NLAB-TESTINGLABM19002 |
|                                                               |                                                |
| <b>Description :</b>                                          |                                                |
| Light Meter                                                   |                                                |
| <b>Technical Specification :</b>                              |                                                |
| <b>Technical Specifications</b>                               |                                                |
| Measurement : 0 ~ 20,000 Lux ( 2 ranges )                     |                                                |
| Display : 13mm LCD, 3 ½ digits                                |                                                |
| Maximum indication : 1999                                     |                                                |
| Resolution : 1 Lux and 10 Lux                                 |                                                |
| Accuracy : ±(5% +2d)                                          |                                                |
| Separate light sensor to measure light at an optimum position |                                                |
| Pocket size, easy to carry out & operation                    |                                                |
| Built in low battery indication                               |                                                |
| LSI circuit for high reliability                              |                                                |
| power : DC 9 volt battery                                     |                                                |
