Product Name :	Product Code :
Temperature Measurement and Calibration	NI AR-TECHNICAL AR36006

Description:

Temperature Measurement and Calibration

Technical Specification:

A bench top unit comprising a hypsometer /hot water bath and ice flask which generate accurate fixed points and variable temperatures

An accurate platinum resistance thermometer with five point calibration certificate and temperature indicated directly in °C is included for reference.

Key Features:

Thermometric properties (physical changes due to temperature) of different sensors are investigated

Condensing vapour (using a hypsometer) provides an accurate fixed point for calibration

Stirred hot water bath provides variable temperatures

Reference with calibration supplied

All electrical sensors can be logged using a PC (optional teaching software available)
