#### **Product Name:**

**Torsional Vibrations** 

#### **Product Code:**

TN996

## **Description:**

**Torsional Vibrations** 

## **Technical Specification:**

### **Torsional Vibrations**

The Torsional Vibrations unit can be used to study torsional vibration on torsion bars with different diameters and different lengths. At the top end, the torsion bars are clamped in a quick-action chuck.

A solid circular disk or a circular ring is fixed at the bottom end of the bar using a quick-action chuck. They have the same mass and the same diameter, but different moments of inertia due to their shape.

The unit is perform the following experiments and investigations:

#### Learning Objectives / Experiments:

Determine the oscillation period as a function of

The length of the torsion bar

The diameter of the torsion bar

The rotating mass and its shape.

#### Specifications:

Torsional vibrations on different torsion bars.

5 aluminium torsion bars with different diameters.

Adjustable effective length of the torsion bars.

Quick-action chucks to swap components.

Generate torsional vibration via a circular disk or ring.

Stopwatch to measure the oscillation period.

Bracket for wall mounting.

Technical Data: Five torsion bars

Aluminium

Length: 1100mm

Diameter: 2mm, 3mm, 4mm, 5mm, 6mm

Circular ring

Outer diameter: 160mm Inner diameter: 100mm

Height: 31mm

Moment of inertia: 0,01335kgmÂ<sup>2</sup>

Circular disk Diameter: 160mm Height: 19mm

Moment of inertia: 0,0096kgmÂ<sup>2</sup>

Stopwatch: 1/100s Dimensions and Weight

Length x Width x Height: 700x200x200mm

Weight: 12kg
