

Product Name :
Trainer for The Study of Transformer

Product Code :
ES541

Description :

Trainer for The Study of Transformer

Technical Specification :

Study the characteristics of a transformer.
Directly mains operated with neon indication for supply and fuse protection.
Built - in multi tapped steps down transformer with shield.
Study and determination of voltage ratio and turns ratio between primary and secondary.
Study and determination of regulation and efficiency of the transformer.
This trainer have modular structure and it consist of didactic panels that installed on a vertical frame.
The modularity of this didactic system grants to the students a direct and immediate approach to the topic, offering the opportunity to study various subjects performing different experiments:
Overcurrent protection
Unbalanced load protection
Directional power protection
Differential protection
