#### **Product Name :** Universal Governor Apparatus

## Product Code : NLAB-ENGINEERINGLB27007

## **Description :**

Universal Governor Apparatus

#### **Technical Specification :**

#### DESCRIPTION

The unit consists of a main spindle driven by variable speed motor. Spindle can be fitted with four different governor assemblies. A scale with pointer is provided. We can calculate each characteristics of each governor at different speed and compare the performance.

## SPECIFICATION

- Drive unit D.C. motor 0 1500 R.P. M.
- Watt, porter, Hartnell and Proell Governor.

## RANGE OF EXPERIMENTS

• Watt, porter, Hartnell and Proell Governor.

Determination of characteristics and comparison with theoretically predicate controlling force curves.

Porter and Proell Governors:-

• The effect of varying the mass of the centre sleeve.

Proell Governors:-

• The effects of varying the rotating mass.

Hartnell Governor:-

• The effects of varying the following parameter.

Initial spring compression.

SERVICE REQUIRED

- Single Phase 15amp Electrical Connection.
- Suitable bench area for mounting the instruments.
