

Product Name :
Winding Machine for Motors and Transformers

Product Code :
ES109

Description :

Winding Machine for Motors and Transformers

Technical Specification :

High precision all geared coil winding machine fitted on a fabricated base frame, geared head is fitted with face plate, having radial slots for holding the winding formers.

A foot pad is provided with machine for gradual increase & decrease the machine's speed.

Provision for change of speeds through gear unit is incorporated inside the gear box of the machine.

Two hand lever is provided with the machine, one lever for precise setting of layer for different wire size and other lever for manual reverse of wire at the end of each layer.

Technical features:

Windings:

coils for motors

coils for transformers

Wires:

Minimum diameter: 0.06 mm.

Maximum diameter: 2 mm.

Coils:

Maximum diameter of the coils: 180 mm.

Maximum width of the coils: 250 mm.

Motor:

Three-phase motor with brake, 0.55 kW, 3000 rpm

Winding modes:

Both automatic and manual winding modes.
